ADOPT-A-CHARGER

Evolve KY is Kentucky's electric vehicle group. Our Adopt a Charger program is a simple way for businesses, foundations and individuals to have a hand in creating clean electric car charging infrastructure in and around Louisville.

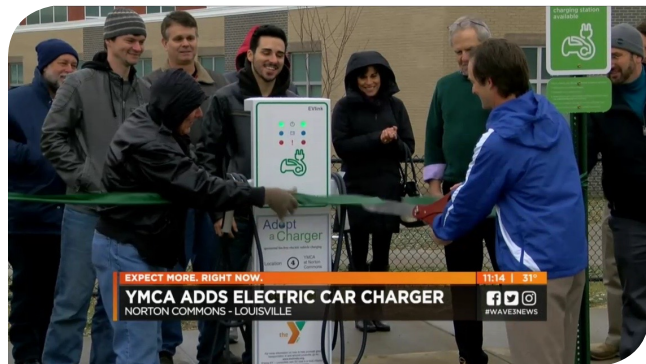

It's as simple as 1, 2, 3!

1. We look for an appropriate site: The perfect place would be somewhere people will stay for typically 45 minutes or more to charge. A shopping area, park, fitness facility, library... you get the idea! We then do a site visit and find out how much it will cost to get a charger installed at the location. Typical cost is between \$5,000 - \$9,000 for a level 2 dual charger (charges two cars).

2. We find funding! Evolve KY searches for sponsors and since we are a non-profit, they get the double benefit of getting a tax-deduction and the marketing value of having their logo associated with this highly visible forward-thinking program.

3. The community gets the benefit of promoting zero-emission vehicles and having a publicly available and free charger for these vehicles for years to come!
